

## **USGS Library Field Trip**

Friday, April 19, 2024

10:30 AM - 12:30 PM Golden/Denver CO

Join us on a joint Flatirons Mineral Club and Colorado Mineral Society field trip to the USGS Library in the Golden-Denver area. We'll learn about their maps, tools, and research materials and get a special peek at their collections. Other topics will include geologic hydrogen exploration, strategic USGS mineral and mapping initiatives, and more. An FMC colleague will brief us on almost 1\B of new buildings going up in Golden (NREL, USGS, etc).

Directions for the trip will be emailed to all registrants a week before the trip. Join us if you can, as this will be your last chance to visit this library. The USGS is consolidating all their libraries to the East Coast soon.

To register, log in to the [FMC website](#). Then select the Field Trips button.
